

**UNIVERSITY
OF ALBERTA**

Collip Centenary Seminar

celebrating 100 years of insulin and diabetes research

from 3:00-4:00 pm on Monday April 8, 2024

followed by a reception until 5pm

in the Li Ka Shing Oborowski Degner Seminar Hall

The Discovery of Insulin to present day clinical care: *Collip and Colleagues, Complex Care, and Care in the Community*

by

Professor Vinod Patel

Professor in Diabetes and Clinical Skills

Warwick Medical School, University of Warwick

Consultant Physician

Endocrinology and Diabetes, and Acute Medicine

George Eliot Hospital NHS Trust

Vinod Patel's research focuses on insulin and the prevention of diabetic complications. His Diabetes Care Team was instrumental in developing the "Alphabet Strategy" for patient-centred, evidence-based, multi-professional diabetes care. This preventative and treatment-oriented strategy has been presented in over 30 countries.

James Collip was the first head of the Department of Biochemistry and was recognized by Royal Society of Canada and Canada Order of Excellence awards for purifying insulin, which transformed clinical care and led to a global insulin market of \$30 billion.

This visit has been funded in part by the Walter Mackenzie Visiting Speaker Fund of the Faculty of Medicine & Dentistry
